

***Panel discussion: "Transformative Impact of Studying Abroad"***

Moderator: **Assoc. Prof. Martina Tomičić Furjan**, Vice-Dean for Science, Projects and International Cooperation, University of Zagreb Faculty of Organization and Informatics

***Short description:***

In today's globalized and interconnected society, student mobility programmes offer unique opportunities for personal and professional growth. This panel discussion is dedicated to delving deep into the diverse benefits these programs provide, shining a spotlight on their transformative effects on students' academic achievements, career trajectories and personal development.

Distinguished international mobility experts, as well as students, will share their valuable insights into how studying abroad promotes cultural exchange, enhances global competencies, and equips students with the skills necessary to excel in an increasingly competitive job market, arguing that mobility programmes not only broaden educational horizons but also play a crucial role in shaping well-rounded, culturally aware and globally competent individuals.
